

TECHNICAL INFORMATION SHEET

ESCORT - CO 70

CHAIN / CABLE LUBRICANT

TYPICAL TEST :

TYPE	:	Calcium Soap, Mineral Oil and Additives
BOILING POINT	:	> 550°F
MELTING POINT	:	Semi Solid
APPEARANCE	:	Black
FLASH POINT	:	400°F
SOLUBILITY in Water	:	Negligible

ESCORT - CO 70 provides constant lubricant for chains, cables and drive systems. It flows freely into chain links.

ESCORT - CO 70 is fully formulated mineral oil containing molybdenum disulphide in stable suspension. Hence, enabling it to provide wide application for drive chain under extreme condition of load, temperature and contamination.

ESCORT - CO 70 can be applied by brush, spray or mist application.
